

ABSTRACT

A gaming terminal for conducting a wagering game comprises an input device for receiving a wager input from a player of the gaming terminal, a display for displaying a game outcome randomly selected from a plurality of game outcomes in a basic game including a start bonus game outcome in response to receiving the wager input, a nonlinear path extending in three dimensions, a at least one movable element for representing a bonus game outcome. The at least one moveable element moves along the nonlinear path in response to the start bonus game outcome being selected in the basic game.
